

Migrate and modernize infrastructure and workloads

Turn your vision into impact

The pandemic transformed organizations. What had been aspirational, became foundational. Today's businesses are competing on a different scale and innovating customer and user experiences. The vast majority are adopting cloud infrastructure to drive these digital initiatives.

Enable critical outcomes for business leaders

- Optimize tech investments** Organizations are realizing a **427% return on investment** while lowering the impacts of their technical debt and doing more with less.
- Increase performance and business resiliency** With more global regions you can reduce latency, guarantee **99.99% SLA against failures** and gain higher availability, disaster recovery and backup compared to on-premise.
- Secure and protect everything** Increase your security posture and compliance management with over 325 regulatory standards out of the box. Using the right tools **reduces time spent on security and compliance by 30%**.³
- Enable agility and innovation** Increase productivity, reduce time to market, and compete at scale. Today **9.5% of an organization's revenue is at risk** due to bad customer and user experiences.

It's easier than ever for you to migrate and modernize all your critical workloads

<p>Windows server and SQL migration</p> <p>Market-leading price performance</p>	<p>Linux and open-source databases</p> <p>Spend less time on administrative tasks</p>	<p>Azure VMware Solution</p> <p>Reduce complexity</p>	<p>Azure Virtual Desktop</p> <p>Built-in security and use existing licenses</p>
